**SVCH Declaration of Conformity
Regulation (EC) No. 1907/2006**

Asahi Kasei Plastics North America (“APNA”) hereby declares that its Thermylene® and Thermylon® product families comply with the requirements of Regulation (EC) No. 1907/2006 (REACH) concerning Substances of Very High Concern (SVHC), as published and updated by the European Chemicals Agency (ECHA). This declaration is based on the SVHC Candidate List update dated February 4, 2026, 253 substances.

Annex XVII (Restricted Substances)

We certify that the aforementioned product lines are manufactured in accordance with the requirements of Annex XVII. Any substances subject to restriction under this Annex, if present, are maintained at concentrations below the applicable regulatory limits for the specified applications.

Annex XIV (Authorization List)

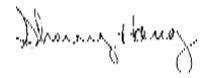

Regarding Annex XIV, the listed product lines are in compliance with the authorization requirements. No substances listed in Annex XIV are present in these products at levels that would necessitate a specific authorization for use or place the product in violation of the sunset dates established by the European Chemicals Agency (ECHA).

Except for the products specifically identified in Attachment 1, all Thermylene® and Thermylon® products supplied by APNA maintain SVHC concentrations below the 0.1% (w/w) threshold defined by the ECHA Candidate List.

Products identified in Attachment 1, the presence of one or more SVHCs above 0.1% (w/w) is disclosed. Please reach out to APNA Customer Service APNA-CustomerService@akplastics.com for additional information regarding the products listed in Attachment 1.

This declaration is based on information obtained from APNA’s raw material suppliers and APNA’s product knowledge and is provided in good faith. While reasonable efforts are made to ensure accuracy, APNA makes no warranty, express or implied, regarding the completeness or ongoing validity of this information.

Sincerely,

A handwritten signature in black ink, appearing to read "Sherry Hang".
